### Additional comments (e.g., about course content/materials, teaching style, etc.):

Would not have made it through the end of this class if my instructor was not a great one!

The style of the class was confusing. We had material that we reviewed each week going up to the midterm, then all the information after didn't really help with our final project or further our understanding. I think it would be better if the final project was the focus of the second half as well as working as a class on EDGCM and not just in homework alone.

The usage of EdGCM as part of the class curriculum was great, but a more thorough explanation on how to use the program would have been helpful.

Very difficult readings for someone without a strong science background.

Learned a lot of valuable information from this class. The work was challenging yet rewarding.

Actually I probably learned more in the course talking to the instructor individually than I did just listening to his lectures.
